

Speech Pathology

Visit one of our offices or we can come to you.

Our experienced Speech Pathologists hold a membership with Speech Pathology Australia. They can provide an extensive range of services to children and adults across the full range of disabilities, disorders and health conditions. Services include communication assessment, speech and language assessments, dysphagia and swallowing assessments as well as the development of mealtime management plans. ORS has comprehensive experience in writing NDIS reports to recommend required communication devices, systems and other essential items to assist in feeding or other speech-related areas. We provide customised social skills and communication training across all settings such as school, home, community and group home/aged care.

These services can be funded by the NDIS, Employment/Disability Services Providers, My Aged Care, or Privately.

The NDIS support category that may cover these services include:

- Improved Daily Living
- My Aged Care
- Early Childhood Intervention
- Lifetime Care (iCare)

Our services include:

- General Speech Pathology Assessments
- Mealtime Management Assessments
- Mealtime Management Support Plans
- Communication Assessments
- Social Skills and Communication Training
- Telehealth

“The support and strategies, as well as the following treatment was so useful and helpful.”

~NDIS Participant Sarah Mills
