

About OUR Social Groups

ORS social groups are carefully crafted to provide a secure environment where people can connect with peers while receiving guidance from practitioners who specialise in paediatrics. The main objective is to facilitate social interactions and foster a sense of community among individuals who share a common interest.

What is Science Group?

Science Group is all about hypothesising, problem solving and collaboration to complete the experiments. Children are encouraged to share their ideas and negotiate with each other to complete each experiment.

We focus on:

- > Sharing our ideas with others, and using our past experiences to guess what might happen
- > Problem solving including developing strategies and asking for help
- > Fine motor skills including drawing, cutting and writing
- > Following directions

Suitable for:

School-aged children
5-12 years.
